

## Liebert Solutions Partners

## Network Protection Products

### Liebert PowerSure® Family

- Off-line & line-interactive UPS models up to 3000 VA
- Professional grade surge strips
- Wide Input voltage range on UPS models
- 4-5 minutes of battery backup at full load
- Battery auto testing and monitoring
- Multiple communication options

### Liebert UPStation GXT2U

- Proven double conversion on-line UPS reliability
- Ultimate power density with capacities up to 6 kVA
- Maximum uptime in an incredibly small 2U space
- External plug-&-play, 2U battery cabinets
- Configuration program allows selection of UPS features to meet specific requirements

### Liebert Nfinity™ UPS

- Modular, configurable UPS up to 20 kVA redundant
- Hot-swap power, battery & control modules for simple field upgrades
- Fault-tolerant Design
- Battery monitoring technology prevents cascading failures
- Self-diagnostics monitors operation & isolates faults from loads
- Fully redundant system control, power modules & battery modules

### Liebert Foundation™ Enclosure System

- Enclosures: adaptive, flexible & secure
- MCR (Mini Computer Room) models: comprehensive critical system protection
- Cooling: computer grade air conditioner, load matched to UPS, back-up cooling, low noise
- UPS & monitoring: on-line systems
- Secure & sealed cable access
- Scalable to support future growth & needs
- Liebert FPC: provides power isolation, distribution & computer-grade grounding in a single Foundation style enclosure
- Liebert FDC: offers additional power distribution capacity for a high number of critical loads in a single Foundation style enclosure

### Power System Maintenance And Management

- Liebert OpenComms Nform: cost-effective system protection monitoring and communications software solution that utilizes existing network infrastructure
- Liebert MicroPOD: maintenance bypass and power output distribution option for UPS systems, including Liebert PowerSure and Liebert GXT 2U models
